

# Quick Product View Extension

DSS

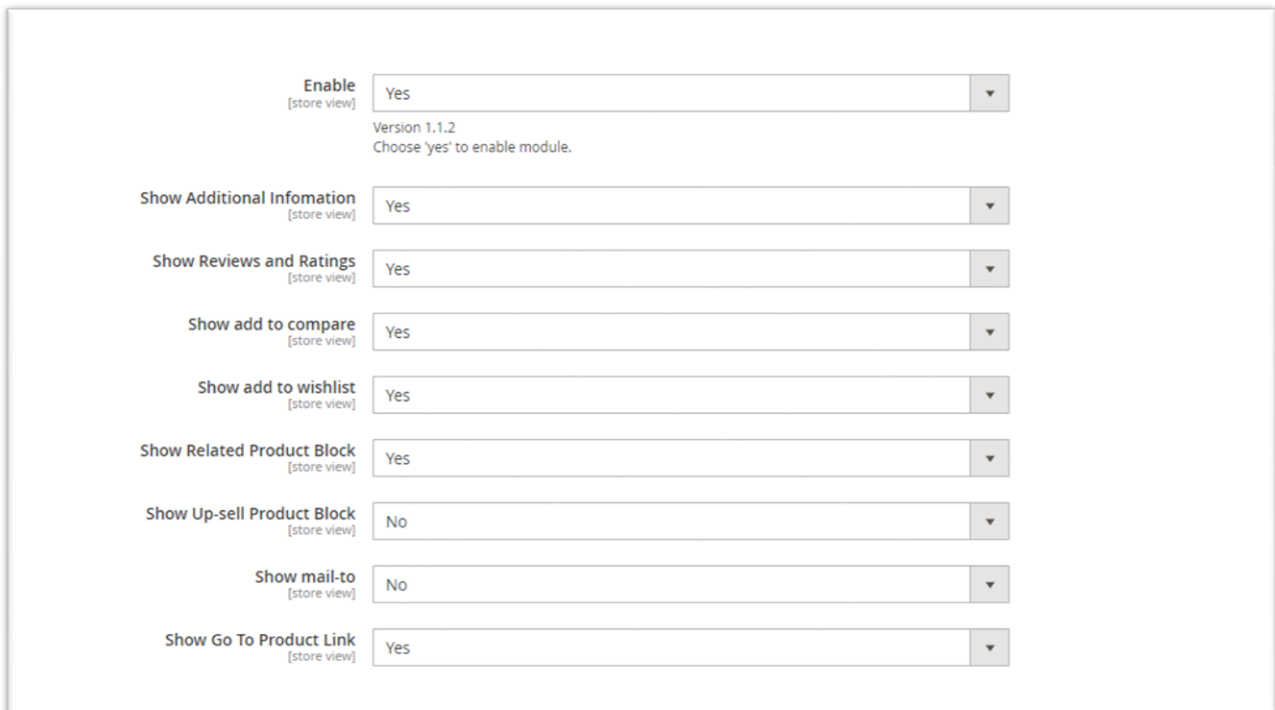

## 1. Quick View for Magento 2 Extension Overview

Quick View for Magento 2 Extension allows customers to check preview of products and add products to cart in Quick View popup without visiting product page. Besides, customers can also execute other actions just like in a real product page, such as: add products to compare, wish list, send email, write review and check related/up-sell products. Admin can easily settings and design of Quick View Popup.

## 2. How Does Quick View for Magento 2 Extension Work?

Please go to Stores => Configuration => DSS COMMERCE => DSS Quick View.

### 2.1 General

The screenshot displays the configuration interface for the DSS Quick View extension. It features a list of settings, each with a label, a dropdown menu, and a 'store view' indicator. The settings are as follows:

Setting	Value	Store View
Enable	Yes	[store view]
Version 1.1.2 Choose 'yes' to enable module.		
Show Additional Information	Yes	[store view]
Show Reviews and Ratings	Yes	[store view]
Show add to compare	Yes	[store view]
Show add to wishlist	Yes	[store view]
Show Related Product Block	Yes	[store view]
Show Up-sell Product Block	No	[store view]
Show mail-to	No	[store view]
Show Go To Product Link	Yes	[store view]

- In **Enable**, choose Yes to enable the extension or No to disable it.
- In **Show Related Product Block**, choose Yes to include related product block in Quick View popup, or No to exclude this information

- In **Show Up-sell Product Block**, choose Yes to include up-sell product block in Quick View popup, or No to exclude this information.
- In **Show mail-to**, choose Yes to enable mail-to option in Quick View popup, or No to leave it out.

- In **Show add to compare**, choose enable add to compare option in Quick View popup, or No to leave it out.
- In **Show Review and Ratings**, choose Yes to include review and ratings in Quick View popup, or No to exclude this information.
- In **Show Additional Information**, choose Yes to include addition information (product detail block) in Quick View popup, or No to exclude this information.
- In **Show Go To Product Link**, choose Yes to enable Show Go To Product link in Quick View popup, or No to leave it out.

## 2.2 Quick View Popup Design

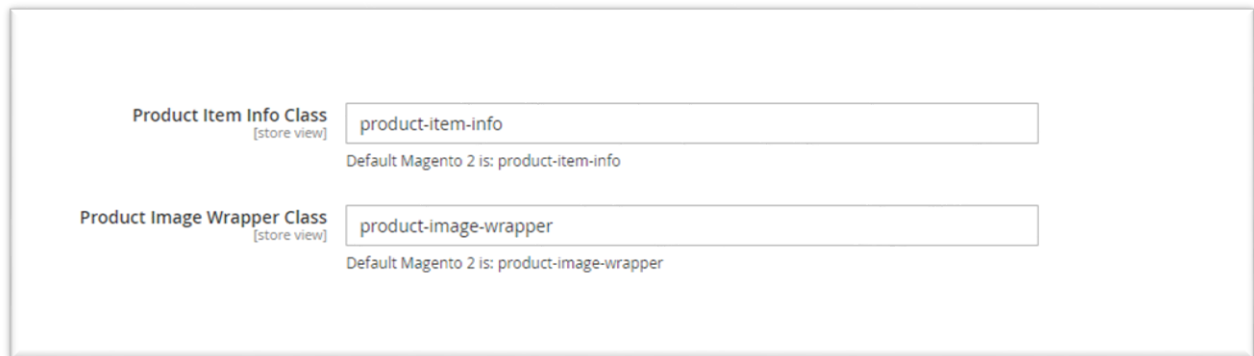

The image shows a configuration panel for the Quick View Popup Design. It contains three settings:

- Button text color** [store view]: A text input field containing the hex code 'FFFFFF'.
- Button text** [store view]: A text input field containing the text 'Additional View'.
- Button color** [store view]: A color selection field showing a blue swatch with the hex code '2727E3'.

- In **Button Text Color**, set color for text on Quick View button.
- In **Button Text**, enter text for Quick View button. Eg: Quick View, View Product, Additional View...
- In **Button Color**, set color for Quick View button.

## 2.3 Setting For Theme

The screenshot shows a configuration interface with two sections. The first section is labeled 'Product Item Info Class' with a small '[store view]' label below it. To the right is a text input field containing 'product-item-info'. Below this input field, it says 'Default Magento 2 is: product-item-info'. The second section is labeled 'Product Image Wrapper Class' with a small '[store view]' label below it. To the right is a text input field containing 'product-image-wrapper'. Below this input field, it says 'Default Magento 2 is: product-image-wrapper'.

- In **Product Item Info Class**, choose class as per your theme otherwise in Magento by default it should be product-item-info.
- In **Product Image Wrapper Class**, choose class as per your theme otherwise in Magento by default it should be product-image-wrapper.
